Annual Water Line Flushing Program

The City of Goldsboro Public Works Department will begin its annual system burnout beginning May 8, 2019. During this time, the City will use free chlorine as the disinfectant in its drinking water system rather than chloramines. Unidirectional water line flushing will begin at 10 p.m. Sunday, May 12. Crews will flush lines from 10 p.m. until 6 a.m. daily except Fridays and Saturdays. The flushing program is expected to last approximately five weeks (through June 14, 2019) unless we experience inclement weather or extremely cold temperatures.

Residents may experience some discolored water during this process. If discolored water is experienced, residents should run their cold water for a short period to clear any discolored water that may be in their plumbing. If this does not resolve the problem, or if residents have any other questions or concerns, they should contact the Public Works Department at 919-734-8674, during their normal business hours, 7 a.m. to 4:30 p.m. Monday through Thursday and 7-11 a.m. Friday.

We apologize for any inconvenience you may experience as we perform this important project.
